powerPerfector sets the standard for success

powerPerfector has qualified as an Altius Assured Vendor following a rigorous independent assessment and accreditation process.

It means the company can now forge links with blue chip businesses like Selfridges, Airbus, SGP Property and Facilities Management, General Healthcare Group, Arcadia Group, Wolseley and Superdrug.

The Altius Assured Vendor status sits alongside the company's ISO 9001, ISO 14001, BS EN 16001 and BS OHSAS 18001 accreditation.

Gary Plant, Managing Director of Altius Vendor Assessment, said: "powerPerfector has demonstrated to our expert assessors that it's a top supplier. This provides complete assurance that it is in sound financial health, with all the necessary health and safety systems, insurance coverage, and other requirements in place to be a competent supplier to large corporate customers. We are delighted to welcome the team as one of our assured contractors."

David Middleton, powerPerfector QUENSH manager said: "Achieving this recognised standard proves our high level of competency. It will enable us to compete nationally for major contracts and boost our reputation as a quality supplier. The major corporate businesses who are partnered with Altius can have confidence in our abilities, and it gives us a golden opportunity to increase our sales."

Altius Vendor Assessment helps companies to assess, improve, monitor and assure their supply base – to reduce their risk and liability and increase performance. The robust online supplier

accreditation and management system, which is free to clients and main contractors, takes a thorough evidence-based approach to checking the competences of suppliers.

By working with suppliers to develop and assess their competences, Altius enhances their status and performance – opening up opportunities to win major contracts with some of the UK's leading businesses.

Notes to Editors:

1. **powerPerfector** is the world's only Voltage Power Optimiser, giving energy, cost and carbon savings by efficiently optimising a site's supply voltage. By optimising the voltage, electrical equipment runs more efficiently and consumes less energy.
2. **powerPerfector** deals with the discrepancy between the actual supply voltage you receive (on average 242V) and the optimum voltage your electrical equipment needs (220V).
3. The technology was developed in Japan in 1993 to combat rising energy costs due to increasing demand and a lack of natural energy resources. In the UK, **powerPerfector** is the sole supplier of Voltage Power Optimisation (VPO)[®] technology.
4. **powerPerfector** acquired the worldwide patents, manufacturing and distribution rights to VPO in June 2011.
5. Manufacture of the **powerPerfector** began in the UK in February 2012.
